

Delta Dental National Coverage

What is Delta Dental National Coverage?

Delta Dental National Coverage is a national program designed to offer our members access to dental care whether at home or away from home.

What makes Delta Dental National Coverage unique?

- The Delta Dental National Coverage network is the largest in the industry with four out of five dentists in the US contracting with Delta Dental.
- All contracting Delta Dental dentists agree to charge Delta Dental patients only fees that are approved by the Delta Dental Plans Association.
- Participating dentists agree not to bill the difference between the fee charged and the fee allowed by Delta Dental if the charge is higher. The patient is not billed for the balance. You are only responsible for deductible and coinsurance amounts based on your contract.
- Your Delta Dental National Coverage follows you wherever you go.

How does it work?

- Choose a dentist from the Delta Dental Premier or Delta Dental PPO network based on your product design. A list of participating dentists can be found on the Internet by going to our web site at www.deltadentalia.com. If you are unsure of your own dentist's contracting status, just call and ask.
- Present your Delta Dental of Iowa information card to your dentist prior to receiving services.
- Your dentist will file the claim for you and we will pay the participating dentist directly.
